About *Research Connections*

These data are made available by the Child Care and Early Education *Research Connections* (CCEERC) project, which promotes high quality research in child care and early education and the use of that research in policymaking. Our vision is that children are well cared for and have rich learning experiences, and their families are supported and able to work.

Research Connections is supported by the Child Care Bureau, Administration for Children and Families of the United States Department of Health and Human Services through a cooperative agreement with the National Center for Children in Poverty, Mailman School of Public Health at Columbia University, and its partner, the Inter-university Consortium for Political and Social Research, Institute for Social Research at the University of Michigan.

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: BDISBL

Label: Has hlth condition that limits activity

Type: N

Length: 3

Question Num: B5

Question Text: Does (CHILD) have a physical, learning, or mental health condition that [limits (his/her) participation in the usual kinds of activities done by most children (his/her) age/ limits (his/her) ability to do regular school work]?

Description: If needed, the interviewer is to elaborate on the question by defining what is meant by a physical learning or mental health condition: For children six years old and older: An ongoing or chronic impairment or condition that limits the child's ability to participate in routine physical education and learning activities at public, private, vocational, or parochial schools. Do not include an injury that occurred three months ago or less as a condition (unless the injury resulted in obvious permanent limitation). Also, do not include pregnancy, childbirth, or the effects of an operation that took place three months ago or less (unless these effects are obviously permanent).
The interviewer is to record YES if the child is enrolled in a special school for children with physical or mental disabilities (such as school for the hearing-impaired or blind, for children with learning disabilities). Also record YES if the child is enrolled in a regular school but spends most of the day in special education classes. Record NO if the child is enrolled in a special school for the gifted or talented.

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: BHLTHP

Label: Current health compared to 12 mos ago

Type: N

Length: 3

Question Num: B4

Question Text: How is your (CHILD's) health in general compared to 12 months ago? Is it:

Description: If the respondent gives an answer other than one of the choices listed on the questionnaire (such as "pretty good") or otherwise shows that he/she does not understand, then the interviewer was instructed to ask the question again starting with the phrase "In general." The interviewer is to emphasize in general and clearly state the list of alternative responses. This question was asked of the MKA only about focal children two years old or older.

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: CAGRAD

Label: Current grade

Type: C

Length: 2

Question Num: C1

Question Text: What grade in school is (CHILD) attending?

Description: Respondents were asked to provide an answer in their own words to this question. This question was only asked for children five years of age or older. It was not to be asked during the interview period from June 13, 1999, through September 26, 1999, when a summer version was asked instead. The usual school grades 1 to 12 were not described, but interviewers were provided with the following notes:
 NURSERY/PRESCHOOL: Educational programs for children before regular kindergarten. These programs are usually provided to children between three and five years old. (The category N was employed. Notice that this code is distinct from .N, which also appears here but means that no answer was ascertained.)
 PREFIRST GRADE: An extra grade provided for some children between kindergarten and first grade. (The category P was employed for this.)
 SPECIAL EDUCATION: Use this category if the respondent volunteers that the child is not in a particular grade because they attend special education classes. Also use this category if the respondent volunteers that the child is in special education as well as a grade. (The category coded is S.)
 HOME SCHOOLED: Child's parents or guardians choose to give their child an academic education at home instead of sending them to school. This does not refer to home learning activities in addition to regular school. It refers to home schooling instead of regular school. HOME SCHOOLING should be used only for children in kindergarten through the 12th grade. (The category coded is H.)

Variable Name: CCHGSC

Label: Changed school past 12 months

Type: N

Length: 3

Question Num: C7

Question Text: How many times did (CHILD2) change schools in the past 12 months? Was it...

Description: If requested by the respondent, the interviewer was to define school changes as any relocation to a different school, including changes because the child's residence changed, or because of grade promotions (for example, changing from elementary school to middle or junior high school). If the respondent asked if a particular situation should be considered a different school, he or she was asked if he/she considers it a different school. The item was coded according to the respondent's reply. This question was only asked of MKAs with children between 6 and 17 years of age attending school in the past 12 months.

Variable Name: CGETBY

Label: Does schoolwork just to get by

Type: N

Length: 3

Question Num: C3C

Question Text: For each of the following statements, please tell me if you think it describes (CHILD2) all of the time, most of the time, some of the time, or none of the time?

c. Does just enough schoolwork to get by?

Description: This question was asked of all MKAs about focal children six years of age or older who attended school in the past 12 months. When necessary, the interviewer was to reread the categories: "Would you say all of the time, most of the time, some of the time, or none of the time?" This question was not imputed if unanswered.

Variable Name: CJOB

Label: Has job for pay past four weeks

Type: N

Length: 3

Question Num: C8

Question Text: Did (CHILD2) work for pay during the past 4 weeks?

Description: This question addressed whether the child worked for pay, defined as any activities for wages or payment, including work at a regular full-time or part-time job. The definition also includes odd jobs for pay, such as baby-sitting, yard work, or newspaper delivery. This question was only asked about focal children 12 years of age or older.

Frequencies	<u>Value</u>	<u>Label</u>	<u>Unwgt Cnt</u>	<u>Unwgt %</u>

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: CLGRAD

Label: Last grade completed

Type: C

Length: 2

Question Num: C2

Question Text: What was the last grade of school, if any, that (CHILD2) completed?

Description: A grade or level of school is completed if the student attended classes through the end of that grade level and met all the requirements for moving to the next grade level:

NURSERY/PRESCHOOL: Educational programs for children before regular kindergarten. These programs are usually provided to children between three and five years old.

PREFIRST GRADE: An extra grade provided for some children between kindergarten and first grade.

SPECIAL EDUCATION: This category was used if the respondent volunteered that the child is not in a particular grade because they attend special education classes. This category was also used if the respondent volunteered that the child is in special education as well as a grade.

HOME SCHOOLED: Child's parents or guardians choose to give their child an academic education at home instead of sending them to school. This does not refer to home learning activities in addition to regular school. It refers to home schooling instead of regular school. HOME SCHOOLING should be used only for children in kindergarten through the 12th grade.

Variable Name: ECCEMP

Label: Had employer coverage sometime last year

Type: N

Length: 3

Question Num: E41

Question Text: What other kinds of health insurance did (you/NAME) have? Was it insurance from a current or former employer or union, insurance purchased directly from an insurance company, Medicare, CHAMPUS, CHAMP-VA, VA, other military health insurance, Indian Health Service, Medicaid (STATE NAME FOR MEDICAID), (STATE HEALTH INSURANCE PROGRAM) or some other type of coverage?

Description: This question identifies types of coverage for members of the target group who had health insurance coverage of some type at the time of the survey and whose health insurance changed during the past 12 months. The interviewer coded all that apply (up to five). Most people had one type of coverage. If they had the same type of coverage at two different times during the past 12 months, it was only coded once. Recorded here were workplace health insurance plans provided by a current employer, a former employer, or a union—including insurance provided through workers who do not live with the family.

Question Num: E37A

Question Text: For how many of the past 12 months did (you/NAME) have health insurance?

Description: The interviewer recorded the number of months the person had health insurance during the past 12 months for members of the target group who are currently uninsured. If the respondent reported less than one month, the interviewer rounded up and recorded 1. Some people may have been insured more than once during the year. For example, they could have been uninsured in January and February, enrolled in a publicly subsidized insurance plan from March through September, and then lost their insurance for the rest of the year. In these cases, the interviewer was prepared to help the respondent compute the total number of months with insurance.

Variable Name: FDOCT

Label: Number of doctor visits last year

Type: N

Length: 3

Question Num: F10

Question Text: During the past 12 months, how many times [have you/has (SPOUSE/PARTNER/CHILD)] seen a doctor? (Do not include the dental, emergency, or mental health visits, or the visits to other health professionals you just told me about. Also, do not include doctors seen while an overnight patient in the hospital).

Description: Definition of "see a doctor": The interviewer included visits with osteopaths, as well as with medical doctors. Telephone calls to doctors or doctors seen while a respondent was an overnight patient in the hospital were excluded. Also excluded were any dental, emergency room, or mental health visits already reported. The interviewer was prepared to work with the respondent to calculate the total number of visits since the date 12 months ago. The respondent was encouraged that their best estimate was fine. If the respondent volunteered that two or more doctors were seen in a single visit, then each doctor seen was counted as a separate visit. If the respondent volunteered that a single visit involved seeing one doctor and one or more of the doctor's assistants (who work under this doctor's supervision), the interviewer counted this as one doctor visit. Note that the codebook frequencies for this variable reflect the actual distribution of the data, while in the public use files, the data have been top-coded to the 99th percentile.

Question Text: During the past 12 months, how many times [have you/has (SPOUSE/PARTNER/CHILD)] seen a nurse practitioner, physician's assistant or midwife? (Do not include the dental, emergency, or mental health visits you just told me about. Also, do not include nurse practitioners, physician assistants or midwives seen while an overnight patient in the hospital).

Description: Definition of "see a nurse practitioner or physician assistant":

Visits with medical personnel other than doctors (i.e., does not include physician visits). The interviewer did not include telephone calls or medical personnel seen while a respondent was an overnight patient in a hospital, or any dental, emergency room, mental health, or doctor visits already reported. If the respondent volunteered that he or she saw a doctor and a nurse practitioner or physician assistant on the same visit, then the visit was counted as a doctor visit in F10, and was not counted here. The interviewer was prepared to work with the respondent to calculate the total number of visits since the date 12 months ago. The respondent was encouraged that their best estimate was fine. Note that the codebook frequencies for this variable reflect the actual distribution of the data, while in the public use files, the data have been top-coded to the 99th percentile.

Variable Name: GCENHR

Label: Hours per week child in group care cntr

Type: N

Length: 3

Question Num: G4

Question Text: In the last month, about how many hours per week was (CHILD1) usually cared for in a nursery school, a preschool, a pre-kindergarten, or a day care center? Please do not include child care or babysitting in someone else's home.

[IF MORE THAN ONE PROGRAM, INCLUDE HOURS PER WEEK ACROSS PROGRAMS]

Description: The interviewer was instructed to record whole hours, rounding up if a half-hour was given. If the total time per week was less than one-half hour, then one hour was recorded. The interviewer was prepared to help the respondent compute the usual number of hours per week. If more than one program was used, the answer to this question reflected the total hours per week, added up across the programs.

Question Text: About how many children are usually in (CHILD1's) room or group at this center or program?

[IF MORE THAN ONE PROGRAM, RECORD NUMBER OF CHILDREN IN PROGRAM USED MOST. PROGRAMS SHOULD NOT INCLUDE HEAD START OR BEFORE- OR AFTER-SCHOOL CARE.]

Description: This question attempted to obtain from the MKA an estimate of the number of children usually cared for together by the caregiver or teacher. (This question is not asking for the total number of children in the whole program, just the number of children that are usually cared for together.) If more than one program was used, then the most frequently used program was recorded. Note that this is different from item G4, which recorded the total hours across programs.

Question Text: We'd like to know how (CHILD1) spent (his/her) time when (he/she) was not with you during the last month. I'm going to read a list of different kinds of programs children attend and of people who care for children. I'd like you to tell me which ones you used for (CHILD1), at least once a week during the last month. First, did (CHILD1) attend...

Description: Head Start is a federally-funded program to help young children from low-income families get ready for kindergarten and grade school. Children who participate are usually between three and five years old, but there are Head Start programs for even younger children. Head Start may be offered in a school, community center, church facility, or anywhere a nursery school may be offered. There are some "home Head Start" programs where a parent teaches children in their home, with occasional visits from a Head Start teacher. If the respondent mentioned that the child is in "Early Head Start," the item was coded YES.

Type: N

Length: 3

Question Num: G10/G33

Question Text: In the last month, about how many hours per week was (CHILD1) usually cared for by someone {other than you/other than you or your (spouse/partner)} in your home?

Description: This item included the hours of care given by relatives, but not care given by the respondent's spouse or partner or by a parent of the child, even if they live somewhere else. We were interested in the usual number of hours per week this child was cared for in the MKA's home during the last month. The interviewer was instructed to record whole hours, rounding up if a half-hour was given. If the total time per week was less than one-half hour, then one hour was recorded. The interviewer was prepared to help the respondent compute the usual number of hours per week. If more than one person cared for the child at home, the answer to this question reflects the total hours per week the child was cared for at home by all caregivers.

Question Text: During the last 12 months did (CHILD)'s father make financial contributions in order to support (CHILD)?

Description: Any money payments a nonresident father makes to support the child are to be counted. The payments could be as little as \$1. These payments may go to the custodial parent, a legal guardian, the child, or the government, but they must be money payments. The interviewer advised respondents not to include clothes, gifts, toys, or other things purchased for the child or taking the child out to eat.

Variable Name: HPARMAR

Label: Child's parents married when born

Type: N

Length: 3

Question Num: H7

Question Text: We're also interested in knowing who (CHILD)'s legal parents are. [Were you married to (CHILD)'s (father/mother)/Were (CHILD)'s mother and father married] when (he/she) was born?

Description: This question may seem sensitive to the respondent. Respondents were told, as needed, that it was being asked because it helps us determine the child's legal parents. If the parents were married at the time of the child's birth, the law recognizes both parents as the legal parents of that child. This question was not asked if the focal child was living with two adoptive parents or with married biological/adoptive parents at the time of the survey. Also, if the focal child was living with an unmarried adoptive parent or with a never married biological parent, the question was not asked. Respondents asked were (1) those with a focal child who lived with a previously married biological mother or father; (2) those with a focal child who did not live with a biological mother or father and lived somewhere else most of the time; and (3) those with a focal child who did not live with a biological parent or with an unmarried adoptive parent.

Variable Name: HPATNTY

Label: Child's legal father estblshd with court

Type: N

Length: 3

Question Num: H8

Question Text: (Has (CHILD)'s father/Have you) been legally identified as (his/her/CHILD'S) father by a court ruling or signed a birth certificate or statement that legally specifies that he is (CHILD)'s father?/Have you been legally identified as (CHILD)'s father by a court ruling or signed a birth certificate or statement that legally specifies that (he is/you are) (CHILD)'s father)?

Description: When a child's parents are not married before the birth of the child, the natural father can be legally recognized as the child's father if he signs a voluntary acknowledgment of paternity or if a court or other legal agency determines that he is the legal father. Signing an application for a birth certificate or having the birth father's name on the birth certificate is usually not enough to establish the birth father as the legal father.

Question Num: N11D

Question Text: Why didn't you get any help?

Description: The interviewer defined the following response categories:

DIDN'T WANT OR DIDN'T NEED TO: The main reason was either that the problem wasn't serious enough, that it was not the respondent's business, or the person was not interested in help even if the problem was serious.

WAITING LIST, PROGRAM/SERVICE DID NOT HAVE ANY MORE SPACE: The main reason was that the program was full. There was no space available at the time it was needed.

PROGRAM/SERVICE COST TOO MUCH OR DIDN'T HAVE MONEY: The main reason was that there wasn't enough money to pay for the help that was needed.

DIDN'T KNOW WHERE TO GO: The main reason was that the respondent didn't know how to get help or where to go for help.

NO SERVICES AVAILABLE IN COMMUNITY: The main reason was that there were no resources in the community available to the person with the problem.

Variable Name: NLESSONS

Label: FC2 took lessons after school last yr

Type: N

Length: 3

Question Num: N7

Question Text: In the last year, has (CHILD2) taken lessons after school or on weekends in subjects like music, dance, language or computers?

Description: "Lessons after school or on weekends" include any lessons or classes that are not part of the regular school curriculum. Lessons can be offered by private or public organizations, and they can be individual or in a group. Music, dance, language, and computers are offered as examples, but lessons can include a wide variety of activities. Sports teams were not included, as they were already counted in item N6. This question was asked of MKAs about focal children between the ages of 6 and 17 (inclusive).

Variable Name: NOUTING

Label: Times in past month took FC1 out

Type: N

Length: 3

Question Num: N5Y

Question Text: How often in the past month have you or any family member taken (CHILD1) on any kind of outing, such as to the park, grocery store, a church, or a playground? Would you say...

Description: "Outings with family members" are defined as times when a family member or relative took the child on a fun, pleasurable, or interesting outing. The activities mentioned as examples were the park, grocery store, church, or playground. Other examples include a trip to the zoo or going out for ice cream. Interviewers were instructed not to include going to the doctor or dentist or traveling to and from a day care site. However, outings were to be included if they were with family members or relatives who do not live with the child. This question was asked of MKAs with a focal child up to five years old.

Variable Name: RESPID

Label: Respondent identification number

Type: C

Length: 10

Question Num: N/A

Question Text: N/A

Description: This is a unique number assigned to each respondent during survey processing. We included it as a convenience to researchers wishing to bring together interview records for the same respondent. The number is unique. However, one respondent may answer for two focal children. In this case, both focal children will share the same RESPID. Similarly, each respondent provided information on his or her spouse/partner as well as him or herself.

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: SEX

Label: Gender

Type: C

Length: 2

Question Num: S6(SEX)/D1

Question Text: [FOR HOUSEHOLDS WITH CHILDREN: Now I'd like to ask about the children in your household who are under 18 years-old.]

[FOR HOUSEHOLDS WITHOUT CHILDREN: To find out who is eligible for the study, I'd like to ask about the people who usually live in your household who are under 65.]

Please tell me just their first name and age.

[FOR EACH CHILD/PERSON, ASK: Is this (child/person) (a boy or a girl/male or female)?]

Description: Gender was obtained for all household members either in the screener (S6) or the household roster in the extended interview (D1). It was only very occasionally missing (see the variable XSEX) and was imputed along with age when necessary. One of the reasons that it was imputed less often than age is that sex could be edited in some cases when a first name was given by the respondent.

Variable Name: U_HRSLY

Label: Hours worked per week last year

Type: N

Length: 3

Question Num: N/A

Question Text: N/A

Description: This variable captures how many hours the sampled adult worked each week in the previous year. The values were based on responses to questions in section I (Employment and Earnings) of the questionnaire. For respondents who were working at the time of the survey for only one employer and who had worked for the same employer for one year or more, U_HRSLY is equal to the workers current usual hours of work (either IHRJBS, IHRSWK or IHRSWKN). For respondents who were mainly self-employed both at the time of the survey and last year, U_HRSLY is equal to the workers current usual hours of work (ISEHR). For all other respondents, U_HRSLY is equal to the hours that they usually worked per week at their main job last year.

Means:	<u>Non-miss n</u>	<u>Min</u>	<u>Max</u>	<u>Mean</u>

	3	Mother is foreign-born noncitizen	2,555	7.11

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: U_SOCPOV

Label: Social family income as % of poverty

Type: N

Length: 8

Question Num: N/A

Question Text: N/A

Description: This constructed variable compares family income received during the year preceding the survey (e.g. 1996 family income for the 1997 NSAF) to the Census Bureau's Federal poverty thresholds for that year, given family size and numbers of children in the family. The social family includes not only married partners and their children, but also unmarried partners, all of their children, and members of the extended family (anyone related by blood, marriage, or adoption to the MKA, the spouse/partner, or their children). Information about the Census Bureau's poverty thresholds is available online at <http://www.census.gov/hhes/poverty/povdef.html>.

To determine family income, questions are asked about the amount of money income received in the preceding calendar year by each person in the sampled family, 15 years old and over. Sources of income include:

- (a) Money wages or salary;
- (b) Net income from self-employment;
- (c) Social Security;
- (d) Supplemental Security Income;
- (e) Public assistance or welfare payments;
- (f) Interest (on savings or bonds);
- (g) Dividends, income from estates or trusts, or net rental income;
- (h) Veterans' payment or unemployment and workmen's compensation;
- (i) Private pensions or government employee pensions; and
- (j) Alimony or child support, regular contributions from persons not living in the household, and other periodic income.

For earnings, this variable uses information reported in Section I: Employment and Earnings. Specifically, this included items on earnings from the year preceding the survey (items I49A - I76). For other sources of income (unearned income) received during the previous year, the variable uses information gathered in Section J: Family Income. Amounts that are reported from the receipt of vouchers or coupons from the welfare office to pay for special expenses (item J5) and food stamps (item J6) are not included in the calculation of family income.

Frequencies	Value	Label	Unwgt Cnt	Unwgt %

3		200%<=family inc<300% of pov line (last yr	7,047	19.61
4		Family income >= 300% of poverty (last yr)	15,759	43.85

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: U_USBORN

Label: U.S.- or foreign-born

Type: N

Length: 3

Question Num: N/A

Question Text: N/A

Description: This variable identifies whether household residents are "U.S.-" or "foreign-born". The foreign-born population includes all persons who are not U.S. citizens at birth. Conversely, the U.S.-born population is all persons who are U.S. citizens at birth. Most U.S.-born are born in the United States, but the U.S.-born population also includes persons born in Puerto Rico or another U.S. territory or outlying area (for instance, Guam, the U.S. Virgin Islands, American Samoa, Northern Marianas Islands, and the Marshall Islands). In addition, some persons born in foreign countries are considered part of the U.S.-born population because they were born to U.S. citizens residing outside the United States. Foreign-born persons include both naturalized citizens and non-citizens (see UIMMSTAT).

Respondents were asked where each household resident was born. For persons born outside the 50 states, the District of Columbia, Puerto Rico, and other U.S. territories and outlying areas, additional questions on U.S. citizenship followed. If a respondent answered that a household resident was a "non-citizen," then that person was coded as foreign-born. Additionally, if a respondent answered that the person was a "naturalized citizen," then they were also coded as foreign-born. A small number of focal children cases (34) were imputed to be U.S.-born, although they were born abroad, because one or more of their parents was a native-born U.S. citizen.

Frequencies	<u>Value</u>	<u>Label</u>	<u>Unwgt Cnt</u>	<u>Unwgt %</u>

	33	3	52	34.26

Variable Name: UACT

Label: Extent of child's extracurricular activities

Type: N

Length: 3

Question Num: N/A

Question Text: N/A

Description: This index, calculated for all focal children ages 6 to 17, enumerates the number of activities a child has been involved in the last year. The value derived is based on the MKA's answers to questions about the child's participation in sports (NSPORTS), lessons (NLESSONS), and clubs (NCLUBA and NCLUBB). If the MKA answers "no" to all three of these questions, he or she is asked whether the child participated in any other organized activity in the last year (NOACT). Positive ("yes") responses are summed, creating an index with scores ranging from 0 to 3.

Frequencies	<u>Value</u>	<u>Label</u>	<u>Unwgt Cnt</u>	<u>Unwgt %</u>

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: UAGE

Label: Age (topcoded)

Type: N

Length: 3

Question Num: N/A

Question Text: N/A

Description: The variable UAGE provides the age for each sampled person, truncated at 85. Ages were asked about early in the NSAF. The first name of each household member was also obtained at this point so that further questions about each individual could be asked using his or her name. In a few rare cases, this variable was missing and was imputed.

Means:	<u>Non-miss n</u>	<u>Min</u>	<u>Max</u>	<u>Mean</u>
	35,938	0	17	8.45

Variable Name: UAGG

Label: Parent aggravation scale score

Type: N

Length: 8

Question Num: N/A

Question Text: N/A

Description: By summing the responses to four items—how often in the past month the MKA felt the child was much harder to care for than most (NPCINTA), felt the child did things that really bothered the MKA a lot (NPCINTB) felt he or she was giving up more of his or her life to meet the child's needs than he or she ever expected (NPCINTC), and felt angry with the child (NPCINTD)—we created a parent aggravation index. The response categories included all of the time (coded 1), most of the time (coded 2), some of the time (coded 3), and none of the time (coded 4). Responses are totaled creating a scale score ranging from 4 to 16. Scores for respondents who answered three of the four questions were standardized to the 16-point scale. Scores for respondents answering less than three questions were coded as 1. A higher score indicates less aggravation.

Means:	<u>Non-miss n</u>	<u>Min</u>	<u>Max</u>	<u>Mean</u>

Description: This variable refers to the relationship of the sampled person to the childless adult respondent 1, obtained from the Household Roster section of the survey (Section D). The relationship classifications are not gender-specific. Researchers who desire gender information will have to combine this variable with the variable SEX in order to determine whether the sampled person is, for example, an aunt or uncle.

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: UBPIA

Label: Age 6-11 Behavioral Problems Index score

Type: N

Length: 8

Question Num: N/A

Question Text: N/A

Description: This scale is used to assess behavior and emotional problems for children ages 6 to 11. Basically, the MKA's answers to the six questions (N4 and N5) are used. These questions concern the MKA's perceptions about the child's behavior in the past month. The response categories included often true (assigned a value of 1), sometimes true (assigned a value of 2), and never true (assigned a value of 3). Responses are totaled, creating a scale score ranging from 6 to 18. A higher score indicates fewer behavior problems. Scores for respondents who answered five out of the six questions were standardized to the 18-point scale. Score values of 1 were assigned to cases that were inapplicable or missing.

Means:	<u>Non-miss n</u>	<u>Min</u>	<u>Max</u>	<u>Mean</u>

Variable Name: UCPSID

Label: CPS family ID

Type: C

Length: 10

Question Num: N/A

Question Text: N/A

Description: CPS family ID is a unique number assigned to each family during survey processing. We included it as a convenience to researchers wishing to bring together interview records for the same CPS family. The number assigned will be the same on all files for the same family and, therefore, may be used to match records from one NSAF public use file to another. CPS family definition considers members of a family to be the householder, spouse of family householder, children in the family, and other relatives of the family householder.

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: UENG

Label: Child's engagement in school scale

Type: N

Length: 8

Question Num: N/A

Question Text: N/A

Description: This scale is used to assess the degree to which focal children ages 6 to 17 are engaged in school. MKAs are asked how often the child cares about doing well in school (CINTSC), only works on schoolwork when forced to (CWRKSC), does just enough schoolwork to get by (CGETBY), and always does homework (CHMWK). The response categories included all of the time (1), most of the time (2), some of the time (3), and none of the time (4). Responses to questions about how often the child only works on schoolwork when forced to and does just enough schoolwork to get by were reverse coded. Responses were then totaled, creating a scale score ranging from 4 to 16. A higher score indicates greater school engagement. Scores for respondents who answered three out of the four questions were standardized to the 16-point scale. Scores for respondents answering less than three questions were coded as missing.

	23,089	4	16	13.04

Variable Name: UENGNEG

Label: Negative school engagement

Type: N

Length: 3

Question Num: N/A

Question Text: N/A

Description: This variable is created using scores from the school engagement scale (UENG). It can be used to identify focal children with low levels of engagement in school. Children whose MKA responses totaled 10 points or fewer on the school engagement scale received a value of 1 for this variable. Children whose score was greater than 10 points received a value of 0. Children whose score was coded as missing or inapplicable were coded I for this variable.

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: UFAMID

Label: Social family ID

Type: C

Length: 10

Question Num: N/A

Question Text: N/A

Description: In addition to grouping respondents using CPS definition of a family, NSAF respondents were grouped according to a second family definition. This “social family” definition included not only married partners and their children, but also unmarried partners, all of their children, and members of the extended family (anyone related by blood, marriage, or adoption to the MKA, the spouse/partner, or their children).

This unique number was assigned to each such “family” during survey processing. We included it as a convenience to researchers wishing to bring together interview records for the same social family. The number assigned will be the same on all files for the same family and, therefore, may be used to match records from one NSAF public use file to another.

Variable Name: UFAMIMM

Label: Family’s immigration status

Type: N

Length: 3

Question Num: N/A

Question Text: N/A

Description: This variable is based on UIMMSTAT and gives information about the immigration status of the focal child’s family. Inapplicables (.I) indicate children who are emancipated and therefore do not have a parent in the HH.

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: UFAMSTR

Label: Living arrangements of children

Type: N

Length: 3

Question Num: N/A

Question Text: N/A

Description: UFAMSTR details information about the child's relationship with his/her parents (i.e., biological, step, or adoptive). A value of 4 means the child lives with two biological or adoptive parents (married or unmarried). A value of 3 means that the child lives with one biological or adoptive parent and one stepparent (parents must be married). A value of 2 means that the child lives with a single biological or adoptive parent (the household may contain this parent's unmarried partner). A value of 1 means that the child lives in a family without a biological or adoptive parent, and children with same sex parents who reported being married were treated the same as children with cohabiting parents.

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: UHHDREL

Label: Detail household summary

Type: N

Length: 8

Question Num: N/A

Question Text: N/A

Description: This variable is based on the CPS variable HHDREL, the detailed household summary, but there are slight differences. In CPS, HHDREL=3 means a child under 18 years, never married while HHDREL=4 means a child under 18 years, ever married. Since NSAF does not gather that information for everyone, we can only search for a spouse present or not present in the household. Also, while some people are coded as unrelated to the reference person, they may in fact have an indirect relationship by way of marriage (e.g., a person is married to the daughter of the reference person or a person whose parent is married to the reference person). The code checks for these situations in assigning UHHDREL. Values for this variable were coded based on RELHEAD.

Frequencies	<u>Value</u>	<u>Label</u>	<u>Unwgt Cnt</u>	<u>Unwgt %</u>
	1	Householder	30	0.08

	4	Chld of hshldr, ever married (spou in HH), <	2	0.01
	6	Other relative of householder	2,969	8.26
	7	Nonrelative of householder	658	1.83

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: UHINS4

Label: Current insurance coverage hierarchy

Type: N

Length: 8

Question Num: N/A

Question Text: N/A

Description: This variable classifies each sampled person's health insurance coverage at the time of the survey into four mutually exclusive groups constructed as a hierarchy. For instance, if someone identified having both employer-sponsored coverage and Medicaid, they were classified as having a value of 1 (Employer-Sponsored) for this variable. The order of the hierarchy was: employer-sponsored own, employer-sponsored dependent, Medicaid, state program, SCHIP, a plan purchased directly from an insurance company, Medicare, military, and other-unspecified type. After persons with multiple coverage plans have been classified according to the specified hierarchy, coverage types are collapsed into the four mutually exclusive groups: employer (including military coverage), Medicaid/State/SCHIP, Other (including private, Medicare, and other), and uninsured. It is created using variables E1-E24.

Frequencies	<u>Value</u>	<u>Label</u>	<u>Unwgt Cnt</u>	<u>Unwgt %</u>
	1	Employer	24,853	69.16
	2	Medicaid/State/CHIP	5,922	16.48

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: UHRDCHIP

Label: Heard of Separate SCHIP Program

Type: N

Length: 8

Question Num: N/A

Question Text: N/A

Description: This variable documents whether or not the MKA had knowledge of the separate SCHIP program in the state of residence if they lived in a state with a separate SCHIP program and if the program name differed from the Medicaid program name. Program name fills are listed in the Section B CATI specs. "Refusal" and "Don't Know" responses were coded as "No."

Frequencies	<u>Value</u>	<u>Label</u>	<u>Unwgt Cnt</u>	<u>Unwgt %</u>
	.I		17,766	49.44
	1	Yes	8,982	24.99
	2	No	9,190	25.57

Variable Name: UHRDMEDI

Label: Heard of Medicaid Program

Type: N

Length: 8

Question Num: N/A

Question Text: N/A

Description: This variable documents MKA knowledge of the Medicaid program in the state of residence. We performed a recode to characterize Medicaid knowledge in 13 states.

In these states, parents were asked about:

- (1) the state's Medicaid expansion program under SCHIP provided it was called by a different name than Medicaid, or,
- (2) the state's separate SCHIP program provided it was called by a name identical to the name of the state's Medicaid program.

If a parent was aware of either of these programs, or the state's Medicaid program, they were coded as having heard of Medicaid. "Refusal" and "Don't Know" responses were coded as "No." Because the survey did not refer to the Medicaid program in Minnesota directly as MinnesotaCare at this point in the interview, there may be lower name recognition of Medicaid in Minnesota. Therefore, state-specific analysis of this variable for cases in Minnesota is not recommended. Note that for cases in states with a separate SCHIP program, called by a different name than Medicaid, knowledge of the separate SCHIP program was collected in BCHIP (item B6).

Variable Name: UIMMSTAT

Label: Immigration status

Type: N

Length: 3

Question Num: N/A

Question Text: N/A

Description: This variable identifies whether or not a household resident is a "U.S.-born citizen"; "foreign-born, naturalized U.S. citizen"; or "foreign-born, non-citizen." U.S.-born citizens are born in the 50 U.S. states, the District of Columbia, Puerto Rico or another U.S. territory (for instance, Guam, the U.S. Virgin Islands, American Samoa, Northern Marianas Islands, and the Marshall Islands). Additionally, some persons born in foreign countries are considered U.S.-born citizens because they were born to U.S. citizens residing outside the United States. Naturalized citizens are foreign-born persons who have become U.S. citizens. Non-citizens are also foreign-born but have not yet become citizens (see U_USBORN).

Respondents were asked where all household residents were born. For persons born outside the 50 states, the District of Columbia, Puerto Rico, and other U.S. territories and outlying areas, additional questions on U.S. citizenship followed. A small number of focal children cases (34) were imputed to be U.S.-born citizens, although they were born abroad, because one or more of their parents was a U.S.-born citizen.

Frequencies	<u>Value</u>	<u>Label</u>	<u>Unwgt Cnt</u>	<u>Unwgt %</u>

	2	Foreign-born, naturalized US citizen	190	0.53
	3	Foreign-born, non-citizen	837	2.33

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: UINCRPOV

Label: CPS family income as % of poverty

Type: N

Length: 8

Question Num: N/A

Question Text: N/A

Description: This constructed variable compares family income received during the year preceding the survey (e.g. 1996 family income for the 1997 NSAF) to the Census Bureau's Federal poverty thresholds for that year, given family size and numbers of children in the family. The family is composed of all household residents related by blood, marriage, or adoption. Information about the Census Bureau's poverty thresholds is available online at <http://www.census.gov/hhes/poverty/povdef.html>.

To determine family income, questions are asked about the amount of money income received in the preceding calendar year by each person in the sampled family, 15 years old and over. Sources of income include:

- (a) Money wages or salary;
- (b) Net income from self-employment;
- (c) Social Security;
- (d) Supplemental Security Income;
- (e) Public assistance or welfare payments;
- (f) Interest (on savings or bonds);
- (g) Dividends, income from estates or trusts, or net rental income;
- (h) Veterans' payment or unemployment and workmen's compensation;
- (i) Private pensions or government employee pensions; and
- (j) Alimony or child support, regular contributions from persons not living in the household, and other periodic income.

For earnings, this variable uses information reported in Section I: Employment and Earnings. Specifically, this included items on earnings from the year preceding the survey (items I49A - I76). For other sources of income (unearned income) received during the previous year, the variable uses information gathered in Section J: Family Income. Amounts that are reported from the receipt of vouchers or coupons from the welfare office to pay for special expenses (item J5) and food stamps (item J6) are not included in the calculation of family income.

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: ULIVARR

Label: FC's living arrangement

Type: N

Length: 8

Question Num: N/A

Question Text: N/A

Description: This variable describes the type of parents/caretakers that each focal child is living with. ULIVARR uses the foster care designation variable and other household relationship data to identify whether the focal child is living with married, unmarried but cohabiting, or unmarried and not cohabiting caretakers. All of the possible combinations of caretakers are coded, although some of the categories do not occur in the data. In other cases, the type of parents/caretakers will appear to conflict with self-reported relationships. For example, a child living with a same-sex couple will be coded as living with a same sex-couple, even though the parents/caretakers may have reported themselves to be unmarried biological mother and step-father. Emancipated minors are given a value of .I, except for emancipated minors who live alone, who are coded 999.

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: UMEDULEV

Label: MKA's highest level of education

Type: N

Length: 3

Question Num: N/A

Question Text: N/A

Description: This variable indicates the highest grade or level of schooling completed for each MKA. A wide range of response modes is allowed for this most detailed measure of educational progress available from NSAF. These include numeric grade level (through 12th grade), type of postsecondary education pursued (e.g., some vocational/technical classes), and specific degree attained (e.g., a bachelor's degree). For example, UMEDULEV distinguishes between individuals who graduate from high school with a diploma and those who complete the 12th grade but do not receive a diploma. Similarly, it distinguishes individuals whose postsecondary schooling is vocationally oriented from those who pursue academic learning.

In forming this variable, vocational/technical classes and certificates are considered a lower level of schooling than college classes and degrees (but above a high school diploma). This is so even though they actually represent a separate educational track from the "high-school-to-college-to-graduate/professional-school" progression that makes up most of the scale.

A high school diploma is ranked above a GED since a diploma is associated with higher earnings. For numeric grade levels up through 12th grade, UMEDULEV indicates the highest grade completed and does not count grades attended but not completed. (A follow-up question ensures that individuals coded as completing the 12th grade have not earned a diploma or GED.) For postsecondary education, completion of a course for credit—not grade-level completion—is counted as the intermediate step toward a degree.

In reporting a given highest level of schooling, UMEDULEV does not indicate whether all prior levels of schooling have been completed or all lower-level degrees earned. For example, a person with a bachelor's degree as the highest level of education may not have earned an associate degree or completed a vocational/technical class (most will not have done so). Except for high school diplomas and GEDs (see UMHSGRAD below), there is no comprehensive way to make such distinctions.

This variable has not been imputed.

Question Num: N/A

Question Text: N/A

Description: The respondent mental health scale is derived by summing the responses to five items that ask how often in the past month the respondent had been a very nervous person (NDEPRESA), felt calm or peaceful (NDEPRESB), felt downhearted and blue (NDEPRESC), had been a happy person (NDEPRESD), and felt so down in the dumps that nothing could cheer him or her up (NDEPRESE).

The response categories included all of the time (coded 1), most of the time (coded 2), some of the time (coded 3), and none of the time (coded 4). Responses to the questions about feeling calm or peaceful and being a happy person are reverse coded.

Responses were totaled, creating a scale score ranging from 5 to 20. Scores for respondents who answered four of the five questions were first standardized to the 20-point scale, then all scores were rescaled, this time to 100 by multiplying by 5. A higher score indicates better mental health. Scores for respondents answering less than four questions were coded as .I (inapplicable).

Means:	<u>Non-miss n</u>	<u>Min</u>	<u>Max</u>	<u>Mean</u>
	35,305	25	100	79.89

Variable Name: UMH2NEG

Label: Negative (poorer) mental health

Type: N

Length: 3

Question Num: N/A

Question Text: N/A

Description: This variable is created using scores from the respondent mental health scale (100 points) (UMH2). Respondents who scored 67 points or fewer on the mental health scale received a value of 1 for this variable. Respondents who scored greater than 67 points received a value of 0. Respondents with a UMH2 score of .I (inapplicable) were given an .I for this variable as well.

	0	UMH2 > 67	29,667	82.55
	1	UMH2 =< 67	5,638	15.69

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: UMHIGDEG

Label: MKA's highest educational degree

Type: N

Length: 3

Question Num: N/A

Question Text: N/A

Description: This variable indicates the highest educational degree held by a sampled person. It provides a sharper, simpler measure of educational attainment than UEDULEVL (see variable UMHSGRAD) while preserving a range of possible responses. As with UEDULEVL, vocational and technical certificates are considered lower-level degrees than college diplomas (but higher than high school diplomas). In fact, they represent a separate educational track from the academic degrees that make up the rest of the UMHIGDEG scale. A high school diploma is ranked above a GED since the diploma has been found to contribute more to later earnings.

In reporting the highest degree earned, UMHIGDEG does not indicate whether all lower-level degrees have been earned. For example, a person with a bachelor's degree may or may not have earned an associate degree. As pointed out earlier, except for high school diplomas and GEDs (see UHSGRADU), there is no comprehensive way to make such distinctions. Also, in moving from highest educational level in UEDULEVL to highest degree in UMHIGDEG, only reported degrees are coded. If another degree logically stands between the highest reported degree and the highest level of schooling in UEDULEVL, it is not coded in UMHIGDEG. Thus, for example, if the highest degree is "associate" when the highest level of education is "completed some graduate or professional classes," no bachelor's degree is inferred. For this reason, the highest-degree variable cannot be thought of as a simple "rounding down" of educational level to the degree that could be assumed to precede it—sometimes the variable reflects an even larger jump.

This variable has not been imputed.

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: UMHSGRAD

Label: Rcvd a high school diploma or GED

Type: N

Length: 3

Question Num: N/A

Question Text: N/A

Description: This variable indicates whether the respondent has received a high school diploma or passed the General Educational Development (GED) test showing that she or he has skills and knowledge equivalent to those of a high school graduate. Those who have done neither are often referred to as “high school dropouts.”

Attaining a high school diploma or GED is associated with higher earnings following school and is particularly important in qualifying an individual for higher education. As a result, many people consider high school/GED status to be the most fundamental indicator of educational attainment and—for lower-income individuals—the most important. Since research has also shown that a GED does not have the degree of association with higher earnings that a high school diploma does, the two credentials are coded separately.

In some cases, possession of a high school diploma or GED is reported in response to questions about the highest grade level completed or the highest degree attained. But not all respondents will make their high school status clear at those points. Consequently, separate, more pointed questions are asked of those who have completed the 11th grade or below or who indicate a vocational/technical certificate or diploma as their highest grade level completed.

Individuals with an associate, bachelor’s, graduate, or professional degree are assumed to have one of the two high school credentials, without NSAF asking or specifying the type. Very rarely does an individual gain entry to and receive a degree from a college or university without a GED or high school diploma.

This variable would be a simple recode of UMEDULEV, except that missing data have been imputed.

Frequencies	<u>Value</u>	<u>Label</u>	<u>Unwgt Cnt</u>	<u>Unwgt %</u>

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: UMKAAGE

Label: MKA's age

Type: N

Length: 3

Question Num: N/A

Question Text: N/A

Description: This variable gives the age of the MKA. Age was obtained when completing the roster section of the questionnaire, section D. It has the same limitations that were discussed concerning the age of the focal child. Notice that, unlike for the age variable for children, some evidence of age heaping exists—particularly on the ages that end in zero. This is not unexpected. The reweighting process mitigates the heaping effect on the weighted data. Generally, grouping age into 5- or, better, 10-year age intervals will reduce any sensitivity that may exist to the measurement error created by the way the question was asked. This questions was top-coded for confidentiality purposes. The largest allowed value was 85. Values larger than this were set to 85.

Means:	<u>Non-miss n</u>	<u>Min</u>	<u>Max</u>	<u>Mean</u>

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: UREADPOS

Label: Child is read to six or more days/wk

Type: N

Length: 3

Question Num: N/A

Question Text: N/A

Description: This variable is used to identify children who are read to or told stories frequently (NREAD). A value of 1 for this variable indicates that the MKA reported that the child was read to or told stories six or more days per week. A value of 0 means the child is not included in this category. If the MKA's response was coded missing for the question about reading or if the question was inapplicable, this variable is also coded as .I (inapplicable).

Frequencies	<u>Value</u>	<u>Label</u>	<u>Unwgt Cnt</u>	<u>Unwgt %</u>

	1	NREAD >= 6	6,199	17.25

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: UREGION

Label: Region

Type: C

Length: 1

Question Num: N/A

Question Text: N/A

Description: In NSAF, we use the regional partitioning of the United States that was set up by the Census Bureau. The Census Bureau divides the United States into four regions, and within each region into divisions, nine in all. The regions are the Northeast, Midwest (formerly North Central), West, and South. The nine geographic divisions have been largely unchanged for the presentation of summary statistics since the 1910 Census:

NORTHEAST REGION. This region consists of two divisions: New England and the Middle Atlantic. New England has six states: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont. The Middle Atlantic Division has three states: New Jersey, New York, and Pennsylvania.

MIDWEST REGION. This region also consists of two divisions: East North Central and West North Central. East North Central has five states: Illinois, Indiana, Michigan, Ohio, and Wisconsin. The West North Central Division has seven states: Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota.

WEST REGION. This region consists of the Mountain and Pacific Divisions. The Mountain Division has eight states: Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, and Wyoming. The Pacific Division has five states: Alaska, California, Hawaii, Oregon, and Washington.

SOUTH REGION. The South Census Region has three divisions: East South Central, West South Central, and South Atlantic. The states are Alabama, Kentucky, Mississippi, and Tennessee for the East South Central Division and Arkansas, Louisiana, Oklahoma, and Texas for the West South Central Division. The South Atlantic Division includes the District of Columbia and the remaining states: Delaware, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, and West Virginia.

For the telephone sample, the regions were derived from the area code of the telephone number. From the in-person component, the regions were obtained from the actual sample addresses. Divisions have been defined here, even though the public use files show only census region.

Frequencies	<u>Value</u>	<u>Label</u>	<u>Unwgt Cnt</u>	<u>Unwgt %</u>
	1	Northeast	8,365	23.28
	2	Midwest	10,688	29.74
	3	South	9,504	26.45
	4	West	7,381	20.54

Variable Name: URELATE

Label: Number of relatives in HH

Type: N

Length: 8

Question Num: N/A

Question Text: N/A

Description: This variable stores the total number of relatives living in the household.

Means:	<u>Non-miss n</u>	<u>Min</u>	<u>Max</u>	<u>Mean</u>
	35,938	0	15	3.12

Variable Name: USATMED

Label: Satisfied with quality of medical care

Type: N

Length: 8

Question Num: N/A

Question Text: N/A

Description: This variable was derived from question B1 in section B of the questionnaire. In some cases, the information shown was imputed. Note that while the source question B1 was asked only of respondents, USATMED has been placed on records for respondents, spouse/partners, and focal children. Refusals and 'don't know' responses are placed in category 5, No opinion.

NSAF FOCAL CHILD FILE CODEBOOK

Variable Name: USUBFAM

Label: CPS subfamily number

Type: N

Length: 8

Question Num: N/A

Question Text: N/A

Description: This variable is a flag for subfamily assignment and is used in creating legal family ID numbers.

Values of USUBFAM are created based on HHCOUNT (number of persons in a household), SPOUSE, PARENT, and OTHREL.

If a person is the reference person, he/she is placed in the first subfamily.

The program cycles through the household roster, searching for spouses and children. Spouses and children are placed in the same subfamily unit as the initial person. Other relatives are also picked up and put into the same subfamily unit as the initial person.

Variable Name: UWELLCHD

Label: No. of well child visits past 12 months

Type: N

Length: 8

Question Num: N/A

Question Text: N/A

Description: This variable uses information from Section F of the survey (variables F13-F15) on the number of well-child visits during the past year.
