About *Research Connections*

These data are made available by the Child Care and Early Education *Research Connections* (CCEERC) project, which promotes high quality research in child care and early education and the use of that research in policymaking. Our vision is that children are well cared for and have rich learning experiences, and their families are supported and able to work.

Research Connections is supported by the Child Care Bureau, Administration for Children and Families of the United States Department of Health and Human Services through a cooperative agreement with the National Center for Children in Poverty, Mailman School of Public Health at Columbia University, and its partner, the Inter-university Consortium for Political and Social Research, Institute for Social Research at the University of Michigan.

Variable Name: UADLTIID

Label: PERSID of respondent B1

Type: C

Length: 10

Question Num: N/A

Question Text: N/A

Description: This variable provides the person identifier of the option B respondent 1 in the family. Option B interviews were conducted with adults under 65 who were not MKAs or spouses of MKAs. One or two option B interviews were conducted in each household, depending on the number eligible adults in the household. If no option B interview was carried out, this variable is coded inapplicable. The first option B respondent was labeled respondent B1; the second, B2. Shorter than option A interviews, option B interviews contained only questions relevant to adults.

Variable Name: UCPSID

Label: CPS family ID

Type: C

Length: 10

Question Num: N/A

Question Text: N/A

Description: CPS family ID is a unique number assigned to each family during survey processing. We included it as a convenience to researchers wishing to bring together interview records for the same CPS family. The number assigned will be the same on all files for the same family and, therefore, may be used to match records from one NSAF public use file to another. CPS family definition considers members of a family to be the householder, spouse of family householder, children in the family, and other relatives of the family householder.

Variable Name: UGENDUNK

Label: Num family members w/unknown sex

Type: N

Length: 3

Question Num: N/A

Question Text: N/A

Description: This variable documents the number of family members whose gender could not be determined. Gender was obtained essentially as part of the question that asked for the age and name of each person in the household. In some cases, gender was determined during the editing process, when a respondent gave a family member's first name.

NSAF CPS FAMILY FILE CODEBOOK

Variable Name: UINCRPOV

Label: CPS family income as % of poverty

Type: N

Length: 8

Question Num: N/A

Question Text: N/A

Description: This constructed variable compares family income received during the year preceding the survey (e.g. 1996 family income for the 1997 NSAF) to the Census Bureau's Federal poverty thresholds for that year, given family size and numbers of children in the family. The family is composed of all household residents related by blood, marriage, or adoption. Information about the Census Bureau's poverty thresholds is available online at <http://www.census.gov/hhes/poverty/povdef.html>.

To determine family income, questions are asked about the amount of money income received in the preceding calendar year by each person in the sampled family, 15 years old and over. Sources of income include:

- (a) Money wages or salary;
- (b) Net income from self-employment;
- (c) Social Security;
- (d) Supplemental Security Income;
- (e) Public assistance or welfare payments;
- (f) Interest (on savings or bonds);
- (g) Dividends, income from estates or trusts, or net rental income;
- (h) Veterans' payment or unemployment and workmen's compensation;
- (i) Private pensions or government employee pensions; and
- (j) Alimony or child support, regular contributions from persons not living in the household, and other periodic income.

For earnings, this variable uses information reported in Section I: Employment and Earnings. Specifically, this included items on earnings from the year preceding the survey (items I49A - I76). For other sources of income (unearned income) received during the previous year, the variable uses information gathered in Section J: Family Income. Amounts that are reported from the receipt of vouchers or coupons from the welfare office to pay for special expenses (item J5) and food stamps (item J6) are not included in the calculation of family income.

Variable Name: UNFAMILY

Label: Num of family members

Type: N

Length: 3

Question Num: N/A

Question Text: N/A

Description: This variable provides the number of people in the social/CPS family. The social family includes not only married partners and their children, but also unmarried partners, all of their children, and members of the extended family (anyone related by blood to the MKA, the spouse/partner, or their children). The CPS family is limited to persons living together in the same household related by blood, marriage, or adoption.

Variable Name: USADT1ID

Label: PERSID of respond B1 spouse

Type: C

Length: 10

Question Num: N/A

Question Text: N/A

Description: This variable provides the person identifier of the spouse of the option B respondent in the family. Option B interviews were conducted with adults under 65 who were not MKAs or spouses of MKAs. One or two option B interviews were conducted in each household, depending on the number of eligible adults in the household. If no option B interview was carried out, this variable is coded inapplicable. The first option B respondent was labeled respondent B1; the second, B2. Shorter than option A interviews, option B interviews contained only questions relevant to adults.

Question Num: N/A

Question Text: N/A

Description: This is the national level survey weight. The weight reflects the original probability of selection of the household, the subsampling done in NSAF to reduce respondent burden, and adjustments made for nonresponse. The weight was further modified, as is customary in household surveys, to correct for net undercoverage. The specific population totals used in the coverage adjustment were obtained from the Census Bureau and are consistent with the concepts employed in the 2000 decennial census.
